

Build a Pollinator Box

A pollinator box (also called a pollinator hotel or bee house) helps to attract pollinators to an ecosystem by providing them with a place to live.

A pollinator box can be constructed from basic materials. Check out the resouces below for instructions for you to build one at home!

Mason Bee House instructions

(suitable for all ages; basic materials often found around the home)

<https://www.pacificbeachcoalition.org/diy-bee-house-recycle/>

Bee Hotel instructions

(for advanced learners; requires some carpentry and special materials)
