

Let's Build a Bee!

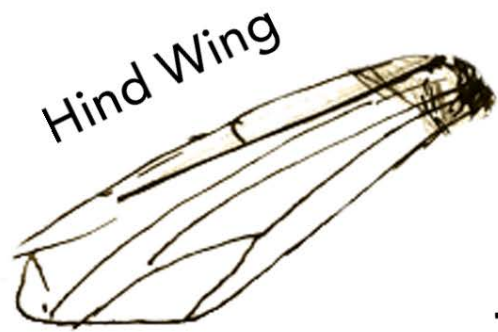

Honey bee bodies have many unique parts.

On the next page, you will find many of these basic parts. Print out the page and cut out each of the parts. Then use the instructions below to construct a honey bee from those parts.

- 1) Connect the top of the **abdomen** to the bottom of the **thorax**.
- 2) Connect the top of the **thorax** to bottom of the head with **compound eyes**.
- 3) Add an **antenna** to the left and right side of the head with **compound eyes**.
- 4) Add the **pollen basket legs** to the left and right side of the lower **thorax**.
- 5) Add the **antenna cleaner legs** to the left and right side of the upper **thorax**.
- 6) Add the remaining **legs** to the left and right side of the middle **thorax**.
- 7) Connect the **hind wings** to the **thorax** on top of the **legs**.
- 8) Connect the **forewings** to the **thorax** on top of the **antenna cleaner legs**.

If you need a hint, try to match the parts to the completed bee on the last page.
