

Waggle Dance!

One way that honey bees communicate is by dancing. The waggle dance informs other bees in the hive where to find food, water, and other resources.

We can perform the waggle dance too! Take a look at this video:

<https://www.youtube.com/watch?v=8oWp1F90354>

Try the waggle dance in the video, or design your own dance with these simple rules:

- The dance follows either a figure-8 or a circular pattern.
- The direction you first face tells others about the direction of the food source.
- The distance you "waggle" tells others about the distance of the food source.
- The intensity of the "waggle" tells others about the quality or quantity of food available.

What does your waggle dance look like?
